PUNK

Forever

Punk Forever

is an exhibition of artwork depicting all aspects, colours and even the 'educational values' of the punk rock movement, through a refreshing and fun look at how punk changed the world, and how it has continued to evolve from 1976 to the present day. In addition to the artwork, Punk Forever includes examples of music, fashion and poetry.

The punk rock story is told via rare and original work created by artists such as Jamie Reid, James Cauty and Billy Childish, and also posters of bands such as The Clash, The Damned and The Sex Pistols.

Artwork collected by Gerrion Jones www.punkforever.co.uk
